

Urban Warfare Training Facade

Excellent for MOUT and Homeland Security Live-Fire Exercises

Provides Live-Fire Training Environments Without Exceeding Your Budget

These urban facades are perfect for MOUT, SWAT and additional live-fire training exercises. The units are economical, support a wide array of target activating devices and are custom designed to meet your specific urban warfare training requirements.

The Urban Warfare Training Facade can be used as a standalone unit or in conjunction with additional structures to provide maximum realism and flexibility within urban training environments.

Designed to Ship by Standard Flatbed Trailer

Supports a Variety of Target Devices (TLD/HFT)

Unlimited Configurations and Applications

Used as Transportable or Stationary Units

Heavy-Duty Tubular Steel Base and Support Structure

Modular Construction Makes Assembly Quick and Easy

Second Story Hinges Down for Transport

Base and Frame are Easily Detachable

Heavy-Duty Tubular Steel Base and Frame Construction

Constructed from heavy-gage tubular steel, the units provide many years of structural durability. The facades are configured as modular units and can be quickly assembled or disassembled on location as well as allowing transportation on standard flatbed trailers. In addition, all fascia components are surface mounted and may be easily modified or replaced.
