

Power Workholding Design & Manufacturing

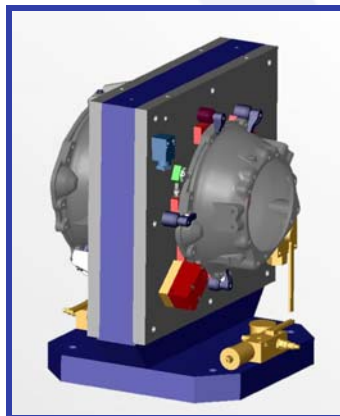

**Standalone or Palletized -
Single or Multi-Function**

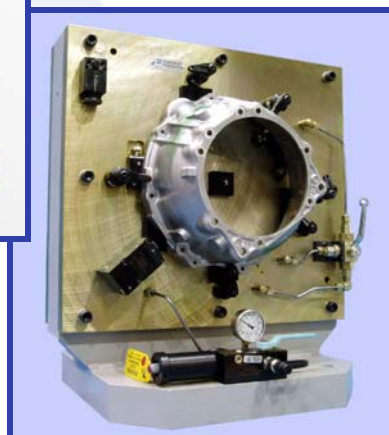

Power workholding fixtures are an effective way to increase productivity, enhance quality, reduce labor and minimize part-to-part changeover times.

With 30 years of service, to a diverse array of manufacturing facilities, Precision Products, Inc. provides the experience and knowledge required to effectively design and integrate the most sophisticated power workholding applications.

PPI will help you maximize throughput and minimize labor while improving part quality and consistency. Contact us for a full review and evaluation of your workholding needs.

**Custom Configurations
Specifically Developed
for Your Application**

Decrease Labor Costs

Reduce Part Handling

Minimize Cycle Times

Multiple Operations in One Setup

**Quick Changeover from Application
to Application**

**Increases Rigidity of Setups for More
Aggressive Machining**

Greater Consistency - Part-to-Part

Enhanced Control of Quality

Multiple Parts Staged in One Fixture

Wide Array of Applications

**Serving All Your
Power Workholding Needs**
