Install on Any Vertical Standard - (standards can be supplied and installed by PPI)

Unlimited Configurations and Applications

Camp Atterbury - Joint Maneuver Training Center

MODEL # PPLL

Eliminate Specialty Equipment

Position Anywhere Along the Vertical Axis

Quickly and Easily Replace, Direct or Configure Lighting

Never again experience the hazard of changing lights from unstable ladders or by using expensive specialty equipment. With PPI Light Lifters you can safely adjust lighting from ground level, (or any predetermined height), in a matter of minutes.

Our one-of-a-kind fixture allows the lights to be positioned at any location along the axis of the lifting frame. This unique feature provides the range director maximum flexibility for achieving the desired lighting angle and intensity.
